PROJECT NAME	Smart Fashion Recommender Application

1. Creating Watson for the application

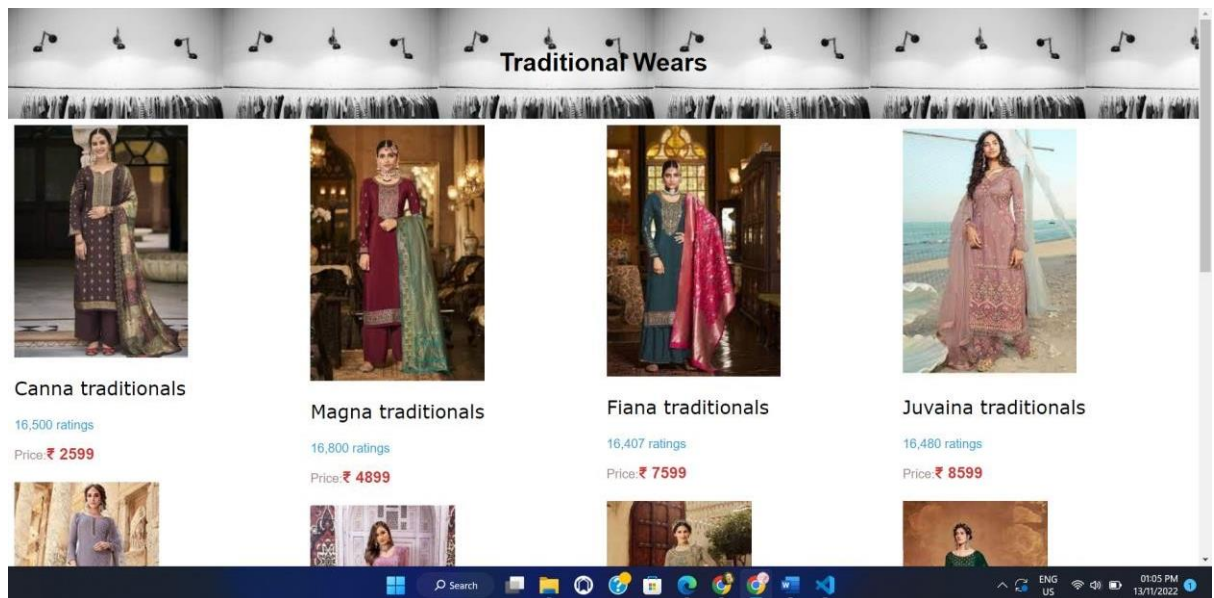

2. Create database connection with python

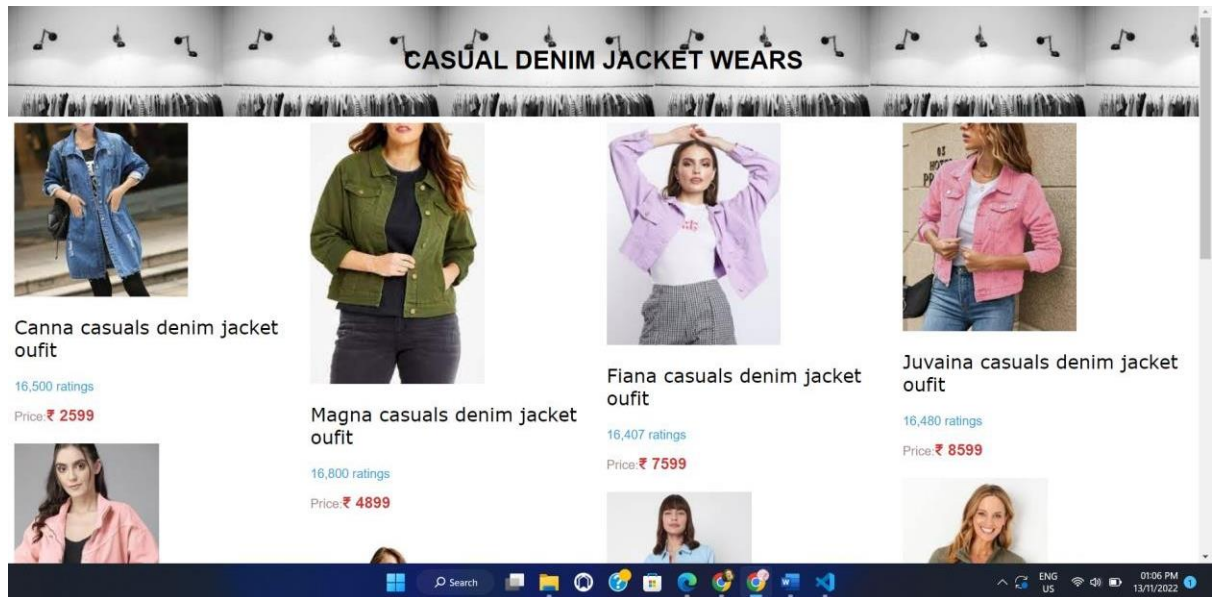

The screenshot shows the Visual Studio Code interface with a Python file named `db.html` open. The file contains a script to connect to a MySQL database using the `mysql.connector` library. The script defines database credentials and attempts to establish a connection. The Explorer sidebar on the left shows a project structure with files like `build`, `dist`, `images`, `mypackage.egg-info`, `action_page.html`, `db.html`, `get_pip.py`, `login.html`, `odbc_test.py`, `privacy.html`, `requirements.txt`, `setup.py`, `signup.html`, `style.css`, `submit.html`, `testes.html`, and `view1.html`. The bottom status bar indicates the file is encoded in UTF-8 and has line endings set to CRLF.
